Product categories

- Rapid tests in microbiology
- Polymerase chain reaction (PCR)

GeneSoC is a genetic measurement device in which a fluorescently labeled probe is used to conduct real-time detection of nucleic acid amplification based on the microfluidic thermal cycling technology. The unique GeneSoC technology enables faster nucleic acid amplification, more compact instrumentation and less power consumption.

Product categories

- Metal cutting, chip removal
- Endoscopes
- Micromolding

**Strength**

- Provide tip components for endoscopes
- Provide mirror finish processing for high quality surface
- Provide high precision parts for lenses of laparoscopy
- Provide drilling holes φ0.1 mm in diameter
- Provide machining of difficult-to-material

We manufacture precision machined components used in a wide range of fields such as OA equipment, automotive, medical equipment, electronic equipment, optical industries, watch, and semiconductor.

We provide high-quality prototyping, rapid prototyping, low volume manufacturing. much more. We also can support R&D.

- Pipettes systems

**TYPE5 Micro Pipette Unit**

TYPE5 bulk-in type micro pipette unit

World's smallest dispensing unit, a mere 8mm thick
(Zero cross-contamination)

Micro pipette unit with disposable tips.
The fluid surface is detected when the sample is aspirated, with the ability to detect aspiration of foreign matter and sufficient fluid volumes, detection data can be captured and added for traceability.

We develop and sell custom-made machines and OEM products, based on 30 years of experience in laboratory automation.

We provide design and development services for chemical devices, medical devices, and controllers for measuring systems. Total support from planning to production is available.

Messe Düsseldorf Japan, Ltd.
25 Years' Experience in Japan's Medical Sector

When it comes to the Japanese medical and healthcare market, there are few companies who have the same experience and insight that Messe Düsseldorf has. For the past 25 years, Messe Düsseldorf Group has been operating in Japan via its subsidiary Messe Düsseldorf Japan, Ltd., bringing Japanese exhibitors and visitors to the MEDICA & COMPAMED in Düsseldorf and related medical trade shows all over the world. During this time, we have built close relations with all major Japanese medical associations and other industry groups, and we have been continually monitoring the domestic medical and health-related devices market. Naturally, we follow international trends as well. Through our presence at the leading Japanese medical trade fairs, we exchange opinions with industry leaders and players, many of whom are repeat exhibitors at Messe Düsseldorf trade shows.

Based on our in-depth knowledge of the Japanese market and our strong network, we provide support to foreign companies in the medical and health business in the following areas:

- **Market Intelligence:** MDJ provides market studies on the structure of the Japanese medical market and its players. We also monitor trade journals to produce timely market intelligence reports for clients.
- **Trade Fair Participation:** Being a trade fair company, of course trade fair participation is our specialty! We handle all interactions with Japanese trade fair organizers, book the space, arrange booth creation, supply personnel and take care of every detail, including professional follow-ups with visitors and the press.
- **Market Access:** Messe Düsseldorf Japan will put you in contact with potential business partners, arrange meetings, and assist in preparing materials suitable for Japanese audiences. We handle the necessary follow-ups once you are at home, and help take care of your future customers.

In short: *We are here to help you!* Messe Düsseldorf Japan, Ltd.
